SUMMARY

Diversely experienced and socially interactive, as an individual and fullstack developer I thrive in creative innovation that consistently push the boundaries in my surroundings.

Professional

Languages— HTML, CSS, JavaScript

Frameworks & Libraries—Node.js, Express.js, JQuery, Bootstrap, Skeleton, Partials, APIs, PHP, React, Ruby on Rails

Database—MongoDB, MySQL, Postgres, SQLite3

Extensive work with website development.

Adaptable to situations and quick to adjust to new procedures.

Leadership and Founding roles.

Talent placement and experience and teaching and coaching.

Social and communicative skills, good with teamwork delegation.

Natural Languages: English, Japanese, Chinese, French, Swedish, Brazilian Portugese and Icelandic

EXPERIENCE

General Assembly, Full Immersive — *Remote*

August 2020 - November 2020

80+ hours a week dedicated to Software Engineering Immersion.

100+ hours inlab to develop project management skills and collaborating solutions with cohorts.

Design in both functionality and user experience in web interfaces.

Focus on fullstack development included programming skills, writing and design in front-end, back-end using html, css, and javascript. Technical coursework included Data Structures, Design Patterns, Software Development and internal software. Emphasis on bug fixing, and frameworks such as node.js, database, jquery, python, software development.

PROJECTS

Project 1 : Programming a Pokedex using API and JQuery on a carousel display using basic html, css, and javascript. https://unangellily.github.io/pokedex/

Project 2 : User interactive Plant directory using MongoDB and Express.js using css of Partials. Web services deployed on heroku .https://frozen-oasis-03811.herokuapp.com/plant

Project 3 : Collaborative project. Uses the Framework React created web services for a blog, deployed on heroku. https://pages.git.generalassemb.ly/unangellily/Outdoor-Adventure/

Project 4: Collaborative project. Uses the Framework React with mongodb to create a database to hold the blog post. Styled using Materialized, deployed on heroku. https://ifatale.herokuapp.com/

Project 5 : Collaborative project. Uses Frameworks React for the front end, php for the backend, and postgres for the database. Styled using Bulma, deployed on heroku. http://rocky-gorge-36503.herokuapp.com/

Project 6 : Application blog using the Framework Ruby on Rails.

EDUCATION

University of Northern Colorado, Greeley CO — Bachelor

August 2008 - December 2015

Bachelor of Arts in Asian Studies | Bachelor of Arts in English | Minor in Music & Psychology
